

## Die-Cut & Adhesive Solutions

- Sealing
  - Dampening
    - Insulating
      - Connecting
        - Protecting

# Competence in Manufacturing

for tailor-made & customer specific adhesive solutions

## Formulating

To match your needs, we can tailor-make our pressure sensitive adhesives to specific properties. By choosing suitable raw materials and additives, we can create an ideal adhesive solution for your adhesive tape:

- flexible • fast
- even in smaller batches

## Developing

We are your partner for your specific ideas and needs. We are open for joint developments and tailor-made solutions.

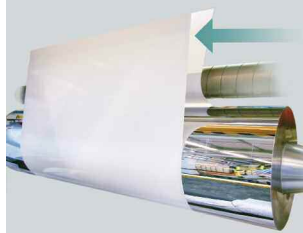

- economical • customised
- reliable • contract-manufacturing

## Coating

Depending on the requirements of an application, we use the most suitable adhesive, carrier and liner

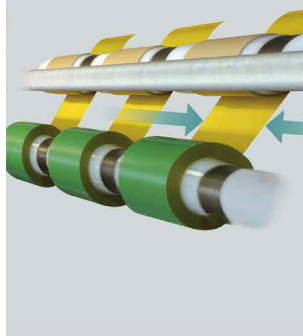

- solvent free
- optimal performance /value
- versatile product- and application benefits

## Fabricating

For ease of use in your application, we adapt and modify the products for optimal dimension and form of delivery, such as rolls, spools, logs, cuts, sheet, packaging etc.

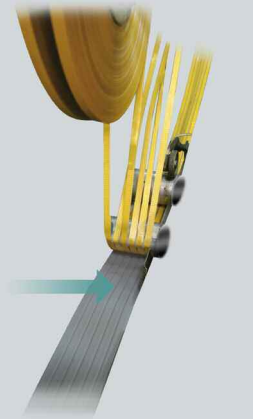

- various dimensions
- individual form of delivery
- for downstream industrial processing

## Laminating

We laminate roll- and sheet-fed substrates such as paper, film or foam to create tailor-made products for you.

- specific product design and laminate construction
- variety of materials

## Stamping (die-cutting)

ASTORplast uses state-of-the-art die-cut machines and techniques for the different types of stamping material.

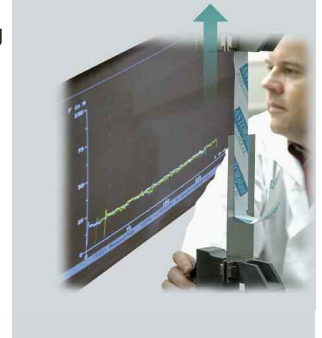

- small to large series
- small to large-sized articles
- precision parts to mass products
- variety of designs, individual versions

## Quality Management

Continuous testing and demanding procedures ensure consistent quality and fulfilment of the specifications. ASTORplast is ISO 9001 certified.

- various testing methods
- high process security

## Applications

- SEALING
- DAMPENING
- INSULATING
- SOFT STORAGE
- CONNECTING
- PROTECTING
- MOUNTING
- SPACING (DISTANCE PADS)
- SECURING LOAD (TRANSPORTATION SAFETY)

# Experience

in different areas of industry and applications

## Building Industry

ASTORplast offers adhesive solutions for interior and roof construction. The products are used in dry wall, roof and façade constructions as well as in many other building applications. Furthermore, ASTORplast offers semi-finished products for manufacturing of profiles in the construction industry.

## Glass Industry

ASTORplast is a key supplier of adhesive solutions for glass and mirror manufacturing industry. For transportation and protection of glass, ASTORplast offers high quality protective products such as cork and foam distance pads in various dimensions.

## Manufacturing Industry

The adhesive solutions of ASTORplast are used in various applications of the processing industry, such as articles for sport, furnitures, shoes, machines, air conditioning /ventilation, sanitary ware, household equipment /appliances.

## Automotive & Transportation

The transportation segment includes vehicle manufacturing in general. Our customers come from such areas as the car industry and sectors supplying this industry as well as rolling stock, transport vehicle, ship or cabin construction. ASTORplast also offers anti-slip mats for transportation safety.

## Development & Partnership

ASTORplast is your partner for adhesive solutions. We are dedicated to find solutions to your needs! Liaise with ASTORplast to create a tailor-made product at optimal cost /performance – this for small or large series.

## Complete Offer for Adhesive Solutions

Our range of products includes the production of single- and double-sided self-adhesive tapes, polymer foams made of PE, PUR, PVC but also cellular rubber (CR, EPDM, nitrile), bitumen, ceramic fibre, felt, and cork. Depending on your requirements, ASTORplast can use acrylate-dispersion, hot-melt and UV-crosslinked adhesives, as well as solvent based systems.

## Form of Delivery

**Rolls**

**Logs**

**Bobbins/Spools**

**Jumbos**

**Sheets**

**Die-Cuts**

Together we achieve a long-lasting and strong connection!

ASTORplast AG belongs to the ASTOR Holding AG, located in Einsiedeln, Switzerland.  
For over 50 years, ASTORplast has been producing adhesive solutions for the European Market.
