

November 2017

**All from a single source – ASTORplast AG and ASTORIT AG become one:
Your new competence centre for « *clever sealing, bonding, protecting* »**

Following increasingly challenging market conditions and changing customer needs, the board of Astor-Holding AG decided to merge the organisations of ASTORplast AG and ASTORIT AG at the location in Einsiedeln / CH in order to take full benefit from synergies in production, purchasing, sales and administration.

The new efficient organisation will offer you as a customer / supplier a wider portfolio of products, services and application solutions in following areas – all from a single source:

- **adhesives:** from structural adhesives to adhesive tapes
- **sealing materials:** from sealant compounds to sealing tapes
- contract manufacturing with **Robot Applied Directly foamed Sealing** (RADS, FIPFG)
- **chemical raw materials** for use in construction and industrial applications
- **contract filling:** from reactive resins to adhesives
- **die-cut parts** and specialty solutions with adhesive technology
- **cork distance pads** and spacers to protect sensitive surfaces

The organisational realignment of both companies will be led by Roland Leimbacher, Managing Director of ASTORplast AG. Both legal entities and brands will continue to exist. Our employees will work closely with you to facilitate a smooth merger and to provide additional value to you.

We are looking forward to working with you and wish you a successful rest of the year.
You can reach your current contact at the usual phone number / email address.

Best regards,

Christian Indermaur

Chairman of the Board of Directors
Astor-Holding AG

Roland Leimbacher
